Section 3 · Walkthrough

Part 1 · Second brain, market research and ICP (L1, L2)

What I built: a Claude Project with the verified Pareto facts, voice and frameworks, brand and funnel assets, and the research document. A research doc with competitors, the ICP and three personas.

Why: to keep every claim tied to a verified source and avoid invented numbers.

Status: in progress — links pending.

Part 2 · Business map (L3)

What I built: a left-to-right map of the whole journey, from ads to contract. Green steps are built; red steps are gaps.

Why: to see the full system and link each step to a real asset.

Status: in progress — link pending.

Part 3 · Project plan and SOP (L4, L5)

What I built: a ClickUp plan with milestones, tasks and subtasks, each with owner, deadline, status and priority, worked backward from October 7. An SOP for launching a lead magnet funnel.

Why: so another person can repeat the process.

Status: complete — 23 tasks imported to ClickUp with milestones M1–M9, owner, deadline, status and priority.

Evidence:

ClickUp board — 23 tasks with milestones, deadlines, priorities and tags:

ClickUp Board

Part 4 · Lead magnet and offer design (L2 / design doc)

What I built: the lead magnet concept, value equation, definition of “qualified”, the Matching Call offer and both thank-you pages.

Why: the audit gives a concrete result from the founder’s own numbers and qualifies naturally.

Qualified: role is founder, CEO, agency owner or executive with hiring authority; revenue of \$500K per year or more; wants help within 90 days.

Part 5 · Lead magnet, live (L6)

What I built: a single-page tool: tick tasks, enter hours, get delegable hours, an estimated monthly value and a Top 10 list.

Why: it works without login, saves nothing, and labels every figure as an estimate.

Link: <https://pareto-delegation-audit.netlify.app/audit.html>

Evidence:

Audit tool — header and intro:

The screenshot shows the header and introductory text of the 'Pareto Talent' audit tool. The browser address bar shows 'pareto-delegation-audit.netlify.app/audit'. The page title is 'Pareto Talent'. The main heading is 'Executive Delegation Checklist & Workload Audit'. Below the heading, there is a paragraph explaining the purpose: 'Tick the tasks you actually handle each week, add the hours, and see which ones should leave your plate first — with an estimate of the time and value they take up.' There are four checkmarks indicating features: 'Free, no login', 'About 15 minutes', 'Runs in your browser', and 'Print or save as PDF'. A light blue box contains a detailed explanation of how the estimate works. At the bottom, there is a section for 'What is one hour of your time worth?' and a 'Powered by Netlify' badge.

Pareto Talent

Executive Delegation Checklist & Workload Audit

Tick the tasks you actually handle each week, add the hours, and see which ones should leave your plate first — with an estimate of the time and value they take up.

✓ Free, no login ✓ About 15 minutes ✓ Runs in your browser ✓ Print or save as PDF

How the estimate works: for each task you tick, we multiply your weekly hours by how delegable it is — anyone could do it (full weight), someone could do it with training (about two thirds), only you can do it (about a tenth). Then $\text{monthly value} = \text{value of one hour} \times \text{delegable hours per week} \times 4.3$. Every number here is an **estimate based on your own answers**, not a promise of results.

What is one hour of your time worth? In your currency per hour. If you are not sure, start with

Audit header

Task matrix — tick tasks and enter weekly hours:

The screenshot shows the task matrix section of the audit tool. It lists several tasks with checkboxes and input fields for 'Hours/wk'. The tasks are: 'Write job descriptions', 'Run reference checks', 'Coordinate onboarding for new hires', 'Keep the team tracker and HR admin current', and 'Decide who to hire and what the role is'. Below these is a section for 'Strategy & founder-only work' with the task 'Decide what the business does next'. To the right, a box titled 'Your week, so far' displays summary statistics: 'Tasks ticked' (6), 'Hours you logged' (6), 'Delegable hours / weekestimate' (3,4), and 'Est. value per monthestimate' (—). It also shows a breakdown of delegable hours: 'Where your delegable hours sit', 'Anyone could do this' (0 h), 'Could do this with training' (3,3 h), and 'Only I can do this' (0,1 h). A 'Clear everything' button is at the bottom of the summary box. A 'Powered by Netlify' badge is in the bottom right corner.

Pareto Talent

☐ Write job descriptions	Hours/wk 0
☐ Run reference checks	Hours/wk 0
☐ Coordinate onboarding for new hires	Hours/wk 0
☐ Keep the team tracker and HR admin current	Hours/wk 0
☐ Decide who to hire and what the role is	Hours/wk 0

Strategy & founder-only work

☐ Decide what the business does next	Hours/wk 0
---	---------------

Your week, so far

Tasks ticked	6
Hours you logged	6
Delegable hours / weekestimate	3,4
Est. value per monthestimate	—

Where your delegable hours sit

Anyone could do this	0 h
Could do this with training	3,3 h
Only I can do this	0,1 h

Clear everything

Task matrix

Result summary — delegable hours and estimated monthly value:

Audit result

Part 6 · Funnel: landing, form, pipeline (L7, L8)

What I built: a landing page with the form embedded, four qualifying questions, redirects by qualification, and a pipeline with an Unqualified stage.

Why: qualified founders go to the booking calendar; everyone else receives the audit and a community invitation.

Evidence:

Form builder — the four qualifying questions:

Part 7 · Automations (L9, L10)

What I built: tags for qualified and unqualified leads, a pipeline with five stages, an opt-in workflow, and a booking workflow. Both workflows are switched off (Draft).

Why: to route each lead to the right path automatically.

Evidence:

1. Tags — j-m-t qualified and j-m-t unqualified:

Tags
Create and manage labels for contacts that help you organize data and run automations

+ Create category + Create tag

Tags Categories

☐	Tag name	Description	Category	Created (-03)	Updated (-03)	Actions
☐	j-m-t unqualified	--	No category	Oct 06, 2026 09:09 AM	Oct 06, 2026 09:09 AM	
☐	j-m-t qualified	--	No category	Oct 06, 2026 09:08 AM	Oct 06, 2026 09:08 AM	

Rows per page: 20 1 - 2 of 2 Previous 1 Next

3. Opt-in Workflow (trigger: form submitted) — tag as Opted-in, create opportunity, send lead magnet email:

Opt-in Workflow

4. Opt-in Workflow (continuation) — internal notification to team, then END:

Opt-in Workflow continuation

5. Booking Workflow (trigger: customer booked appointment) — create/update opportunity, then END:

Booking Workflow

6. Follow-up Workflow (trigger: j-m-t qualified tag) — 3 emails with value and nudges:

Follow-up Workflow

7. Nurture Workflow (trigger: j-m-t unqualified tag) — 1 email delivering the lead magnet:

Nurture Workflow

8. Email notification on form submission:

Notifications

Part 8 · Launch materials (L11)

What I built: five ads with different angles and personas, each with offer, qualifier, proof, mechanism and call to action; five images in one visual identity.

Why: each ad targets a different cause of the same problem.

Status: complete — 5 images generated in Google Flow (3:4, 896x1200), same founder, brand palette (#2563EB / #1E3A8A). Uploaded to Drive with the ad copy doc: <https://drive.google.com/drive/folders/1FGRp8fu15pmlEvgVX-ipGLxhUvNt0lQM?usp=sharing>

Ad 1 · Diagnosis

Headline: Find What to Delegate First **Description:** Free audit for business owners **CTA:** Download

Primary text: Is it a people problem or a delegation problem?

When a company runs on its founder, the cause is often delegation, not talent, capital or effort.

Our free Executive Delegation Audit shows which tasks to hand off first. It takes about 15 minutes. Hours and value shown are estimates.

From Pareto Talent, which has served 100+ founders.

Do the Math on Your Week

Headline: Do the Math on Your Week **Description:** Free for founders **CTA:**
Download

Primary text: What is one hour of a founder's time worth?

Count the weekly hours spent on inbox, calendar and reports, then multiply by the value of an hour.

Our free audit does the math for you (it's an estimate, not a promise) and lists the first 10 tasks to hand off.

Headline: Before You Hire Again **Description:** Free delegation audit **CTA:** Download

Primary text: Why a first assistant often doesn't work out.

When it doesn't, the cause is often a missing system: no clear handoff, no training, no plan B.

Before hiring again, get clear on exactly what to hand off. Free audit, about 15 minutes.

Pareto Right Hands are chosen from 1,000+ applicants.

Ad 4 · The Fragility — Systemless Operator

Ad 4 · Fragility

Headline: What Only You Can Do **Description:** Free audit for owners **CTA:**
Download

Primary text: Some businesses only run while the founder is online.

When knowledge lives in one person's head, the business depends on that person.

Sort what only the founder can do from what anyone could do. The free audit gives you the list.

Pareto Right Hands train 40+ hours before placement.

Ad 5 · The Paradox — AI-Tool Hoarder

Ad 5 · Paradox

Headline: Tools Aren't a Plan **Description:** Free delegation audit **CTA:** Download

Primary text: AI tools don't decide what to delegate.

Tools do nothing until someone decides what they should do. Start with the decision: which tasks should leave a founder's plate?

Free audit, about 15 minutes. Estimates only.

From Pareto Talent, which has served 100+ founders.

Part 9 · Presentation (L12)

What I built: a 2:33 screen-recording walkthrough with English narration and subtitles, and this PDF.

Why: to show how the lead magnet moves a founder toward a Matching Call.

Link: <https://www.loom.com/share/1adc239c895c4a7aa9f2a200b59b5746>

Extra mile · Recommendations

1. Re-test the form with 5 real founders from the 3X Freedom community before launch.
2. Test the four hooks against each other, one variable at a time.
3. Add a short case or a named testimonial near the form once Pareto approves it.
4. Next lead magnet: a “Founder Handoff Brief” generator (Claude Skill).
